

DARK ORDER

The Sith Order began two millennia ago with a renegade Jedi who sought to use the Force to gain control. Strengthened and twisted by the dark side, the Sith fought each other until just one remained: Darth Bane. Bane remade the Sith as an order that would endure in only two initiates at a time.

Hooded and unseen, Maul prides himself on his abilities as a tracker, and relishes the challenge of difficult assignments given to him by his Sith Master.

PROBE DROID

One of Maul's most useful tools is the "dark eye" probe droid, a device that can be programmed to seek out individuals or information.

Maul's diabolical appearance recalls the ancient image of a horned demon. This woodcut of the devil dates from the European witch craze of the 17th century, when thousands of people were tried on suspicion of witchcraft and burned at the stake.

DARTH MAUL

Apprentice to Darth Sidious, Maul is one of the most highly trained Sith in the history of the order. He serves his master obediently, believing that his own time for domination will come. His tattooed face symbolizes his dedication to the dark side.
